SUMMARY

Senior Frontend Engineer with 5 years building and scaling B2C web apps for emerging-market users. Specialized in Next.js, React, and web performance — verified Lighthouse 92+ and Core Web Vitals: Passed on Bazaar's flagship app (100k+ active web users, 1M+ Android downloads). Comfortable across Node.js / NestJS for BFFs and internal services.

KEY ACHIEVEMENTS

- **Web Vitals & SEO turnaround** — Co-led the image-optimization + CDN-tuning pipeline (Next.js Image, viewport-aware lazy loading) on bazaarapp.com, cutting **LCP 40%** and taking Core Web Vitals from failing to **Passed** under Pakistani 3G/4G conditions. Organic search grew from ~0 to **156K monthly clicks / 11.2M impressions** (Google Search Console, avg. position 7).
- **CDN cost optimization** — Co-designed asset delivery + caching strategy across web and Android, cutting CDN spend **~$450/month (~$5,400/year)** with no regression in image quality.
- **MUI → Tailwind + Radix migration** — Owned the migration on a high-traffic Next.js app: eliminated runtime style injection, preserved accessibility contracts across 38 files / ~1,900 lines changed.
- **Revenue-driving engineering** — Shipped PM-designed gamification (order-threshold reward levels) on the customer app, lifting **customer order value 47%**.

EXPERIENCE

Bazaar Technologies — Islamabad, Pakistan
Senior Software Engineer · Mar 2023 — Present

Promoted from Software Engineer II in Dec 2024. Currently working on identity for the Keenu acquisition (post-acquisition restaurant-management platform).

- Lead frontend on **bazaarapp.com** (Next.js + NestJS BFF) — flagship customer web for Pakistan's largest B2C grocery platform.
- Owned the image-optimization + CDN pipeline that took CWV from failing to Passed (40% LCP cut, Lighthouse 92).
- Drove the MUI v5 + Emotion → Tailwind + Radix migration — eliminated runtime style injection while preserving accessibility contracts.
- Built **Bazaar Partner Portal** (React, MUI, React Query) — internal vendor-analytics surface integrated with Bazaar's component library.
- Replaced finance team's manual invoice + tax-calculation workflow with an automated pipeline integrated into internal apps.
- Shipped customer features cross-platform — Next.js web and customer Android app (Kotlin / Jetpack Compose / MVVM).

Orcalo Holdings — Rawalpindi, Pakistan
Senior Frontend Engineer · Frontend Team Lead · Oct 2021 — Mar 2023

- Mentored a team of **24 junior frontend developers** across multiple client projects.

— Introduced and enforced the **Component-Container** pattern across the FE codebase, separating UI from business logic.

— Integrated **React Query** into legacy Redux-heavy projects, cutting redundant API calls and improving cache behavior.

Junior Node.js Developer · Aug 2021 — Oct 2021

— Built APIs and server-side components against Airtable, Twilio SMS, and SendGrid integrations.

Web Mekanics — Rawalpindi, Pakistan

Software Engineer Intern (Python · Frontend) · Nov 2020 — Jun 2021

— Built responsive frontends for automobile-related products.

— Built REST APIs in Django for real-time data insights.
