Malik Abdul Rehman Khursheed

Front-End Heavy Full-Stack Engineer (React, Next.js, TypeScript, Node.js, NestJS, PostgreSQL)

Islamabad, Pakistan (UTC+5), open to remote | +92 304 591 9454 | malik.ali5560@gmail.com

linkedin.com/in/malik-abdul-rehman | github.com/AbdulRehmanKhursheed | abdul-rehman-portfolio-ecru.vercel.app

Senior software engineer with nearly 6 years of experience building and scaling high-traffic web applications. Specialized in React, Next.js and TypeScript, with backend experience in Node.js, NestJS and Go. Architected and built the Keenu One restaurant storefront, now live for seven brands, and the visual builder merchants design their stores in. Track record of improving web performance, cutting infrastructure costs and raising order value. Experienced in Agile, TDD and mentoring teams.

KEY ACHIEVEMENTS

- **Seven restaurant brands live:** Architected and built the Keenu One storefront, one Next.js codebase that serves sirocpk.com, ifyoulikecheese.com, downsouth.coffee, caffepraha.com, cantinapk.com, purplecowpk.com and bracipk.com, plus the visual builder each merchant designs their store in.
- **Web Vitals improvement:** Co-led an image optimization and CDN pipeline on Bazaar's flagship web app that cut LCP by **40%** and passed Core Web Vitals at Lighthouse **92**.
- **$450/month CDN cost saving:** Caching and asset optimization across web and Android, about **$5,400** a year.
- **Revenue impact:** Built the gamification feature that raised average order value by **47%**.
- **Organic growth:** Technical SEO work that grew Google organic search from near zero to **156K** clicks.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, HTML, CSS, Go, Python (working knowledge)
Frontend: React, Next.js (App Router, Server Components), Redux Toolkit, React Query, Zustand, Zod, Tailwind CSS, SCSS, MUI, Radix UI
Backend: Node.js, NestJS, Express.js, Go, REST APIs, OpenAPI (Swagger), MongoDB, PostgreSQL, Firebase Auth, OAuth 2.0 and OIDC (Zitadel)
Testing: Vitest, Jest, React Testing Library, Playwright (end-to-end and visual regression), Go testing, Storybook
Cloud and DevOps: AWS (S3, CloudFront, Lambda, Route 53), Docker, GitHub Actions, CI/CD, Vercel, Prometheus, Grafana
Performance and SEO: Core Web Vitals (LCP, INP, CLS), Lighthouse, real-user monitoring, CDN caching, image optimization, structured data
Practices: Agile, TDD, SOLID, Clean Architecture, micro-frontends, code review, mentoring, AI-assisted development

EXPERIENCE

Bazaar Technologies (now Keenu One) — Islamabad, Pakistan
Senior Software Engineer II — *Mar 2023 - Present*

Keenu One restaurant commerce platform

- Lead engineer of the Keenu One storefront (Next.js 16, React 19, TypeScript). Architected and built it, took it from first commit to three live restaurant brands in under four months, and to **seven live brands** today.
- Designed the multi-brand theme system: one codebase serves every restaurant, and a new brand ships as a theme plus config instead of a separate project. Built eight of its ten themes.
- Built the **visual storefront builder**: a catalog of **29** shared parts (header, hero, menu, cart, checkout, orders, footer, custom-page blocks), each with several looks, under every theme. A merchant opens their real store on a canvas in the merchant dashboard (React, Vite), clicks any word to reword it, clicks any box to style it, sets phone-specific values, builds custom pages and publishes with no deploy, with drafts, version history, undo and publish checks.
- Built custom-domain support end to end: the domains table and admin API in the Go merchants service, the cached resolver in the Go BFF, the per-restaurant domains screen in the dashboard and the storefront's tenant cookie.
- Built the test suite the team ships behind: **990+** Vitest unit test files and all **19** Playwright end-to-end suites with visual-regression baselines, sharded on GitHub Actions on every push.
- Own the storefront's Docker image, CI/CD pipelines, staging and production deployments. Added real-user performance monitoring (Web Vitals to Prometheus), so LCP, INP and CLS are measured on live customer traffic.
- Top contributor to the storefront's **Go** backend-for-frontend (tenant resolution, menu, checkout rules and order flows). Wrote most of its tests, taking coverage from about 30% to 99%, and added race-detector runs to CI. In the Go identity service, added admin access checks (Zitadel), service-account token caching and OpenAPI generation.

Bazaar Web App

- Led frontend development of Bazaar's flagship B2C grocery web app (**Next.js, NestJS**) for 100k+ active users. The app was retired in 2026 when the company moved to Keenu.
- Co-led the image and CDN optimization that cut LCP by 40% and passed Core Web Vitals, and reduced CDN costs by $450/month.
- Built the gamification feature that raised average order value by 47%, and drove the migration from MUI to Tailwind CSS and Radix UI.
- Built the Partner Portal in React, and automated invoice generation and tax calculations that the Finance team used to do by hand.
- Promoted twice: to Senior Software Engineer in Dec 2024 and to Senior Software Engineer II in Jul 2026.

Orcalo Holdings Rawalpindi, Pakistan

Senior Frontend Engineer and Junior Frontend Team Lead *Oct 2021 - Mar 2023*

- Hired, mentored and managed a team of **24** junior frontend developers, reporting to the Frontend Lead.
- Delivered client projects in React, Next.js and Angular.
- Introduced the Component-Container pattern to separate UI from business logic, making components easier to test and maintain.
- Added React Query to legacy Redux-heavy apps, cutting duplicate API calls and unnecessary re-renders.

Junior Node.js Developer *Aug 2021 - Oct 2021*

- Built APIs and server-side integrations with Airtable, Twilio SMS and SendGrid.
- Documented TypeScript processes, including database schemas.

Web Mekanics Rawalpindi, Pakistan

Software Engineer Intern (Frontend and Python) *Nov 2020 - Jun 2021*

- Built responsive frontends for automobile products.
- Built REST APIs in Django for real-time data insights.

HIGHLIGHTED PROJECTS

- **Keenu One Storefront**: sirocpk.com, ifyoulikecheese.com, downsouth.coffee, caffepraha.com, cantinapk.com, purplecowpk.com, bracipk.com | Next.js 16, React 19, TypeScript, Go
- **Keenu One Merchant Dashboard and Storefront Builder**: console.keenu.one (login required) | React 19, Vite, TypeScript
- **Keenu Corporate Site**: keenu.pk | Next.js, Tailwind CSS. Built end-to-end.
- **Bazaar Grocery App**: Google Play, 1M+ downloads | Contributed features on Android and web.
- **Check My DBS**: DBS certificate verification platform for UK companies | React, Next.js, TypeScript, RTK Query

EDUCATION

BS Computer Science, HITEC University, Taxila | 2017 - 2021 | GPA 3.29 / 4.00

CERTIFICATIONS AND COURSES

Microsoft Technology Associate (MTA): Introduction to Programming Using Python | React with Redux and Next.js (Academind) | Angular Mastery (Academind) | AWS Technical Essentials | Node.js (Code with Mosh)

ACHIEVEMENTS AND AWARDS

- Hackathon Runner-Up, Bazaar Technologies
- Runner-Up, Speed Programming Competition, HITEC University
